Dear Potential Donor,

On January 3rd of 2011, Danny Toumarkine was life flighted from Teton Pass Resort in Montana following a snowboarding accident. Danny suffered a Traumatic Brain Injury (TBI) and has undergone treatment for this at the Benefis Hospital in Great Falls, MT. Thus far, Danny has had two craniotomy surgeries and is in stable condition. Though heavily sedated, Danny shows signs that he will eventually recuperate from this injury, but it will be a long road to recovery.

It is expected that Danny will be in the ICU for three weeks before he moves on to the Progressive Care Unit for two weeks. From there Danny will move on to a rehabilitation program for an indefinite period of time.

Our family and friends have begun to organize fundraisers to assist with the financial obligation from this event. The goal of these events will be to not only raise money for Danny, but also awareness for TBI. These fundraisers could be helped significantly with donations for raffles. If you have any goods or services you might be able to donate to the raffle our family would be forever grateful.

All businesses and individuals who donate will be listed on the "donations" page of the website www.dannyisthebomb.com. This website is currently averaging 3,000 hits per day.

Thank you very much for helping to get Danny back on his feet.

Sincerely,

Conor Toumarkine

(Danny's Brother)
